

GEEKY

The Intellectual Self-Learning Platform

iOS • Android • Web

PRODUCT REQUIREMENTS DOCUMENT (PRD)

Version 1.0 | Confidential

June 2026

Document Information

Product Name	Geeky — The Intellectual Self-Learning Platform
Document Type	Product Requirements Document (PRD)
Version	1.0
Date	June 2026
Status	Draft — For Review
Platforms	iOS, Android, Web (Progressive Web App)
Target Audience	Students, lifelong learners, academics, professionals
Prepared By	GeekyWorld Product Team

1. Executive Summary

Geeky is a credential-blind, AI-powered intellectual self-learning platform that brings the breadth of Ivy League and world-class university curricula to anyone with a smartphone or browser. Inspired by the course catalogues of Harvard, Oxford, Stanford, MIT, and peer institutions, Geeky curates rigorous, evolving subject matter across humanities, sciences, mathematics, languages, engineering, and the arts.

Unlike passive content-streaming platforms, Geeky closes the learning loop: AI-generated flashcards and quizzes are produced automatically from every piece of content a user consumes, driving active recall and long-term retention. A gamified profile system rewards consistency and mastery. A structured debate arena transforms knowledge into discourse — mirroring the intellectual culture of great universities while making it globally accessible.

Geeky's visual identity draws from ancient Greek architectural aesthetics — marble textures, columned motifs, warm parchment palettes — merged with the best engagement patterns of Duolingo, Coursera, and elite digital academy interfaces.

2. Vision, Mission & Goals

2.1 Vision

To become the world's foremost credential-blind intellectual gymnasium — where anyone, anywhere can pursue the depth and rigour of an Ivy League education, earn recognition for knowledge rather than affiliation, and engage in civilised global discourse.

2.2 Mission

Deliver an AI-closed-loop learning experience that combines curated university-grade content, automated active recall, gamified progression, and debate — all within a beautiful, classy, library-themed interface.

2.3 Strategic Goals

Goal	Metric	Target (Year 1)
User Acquisition	Registered accounts	500,000 users
Active Learning	Daily Active Users (DAU)	30% of registered users
Retention	30-day retention rate	≥ 45%
Engagement	Avg. session duration	≥ 18 minutes
Revenue	Premium conversion	≥ 8% free-to-paid
Content	Subjects available	200+ subjects at launch
Debate	Weekly debate threads created	10,000+

3. Target Audience & Personas

3.1 Primary Personas

Persona 1 — The Ambitious Self-Learner

Age 18–28 | No access to elite institutions | Highly motivated | Wants recognised intellectual depth without a degree price tag. Uses Geeky to learn Philosophy, Economics, and History; debates global ideas; builds a visible Knowledge Profile.

Persona 2 — The University Student

Age 18–24 | Enrolled in college | Wants supplemental depth | Uses Geeky's AI flashcards alongside coursework; earns streaks between semesters; compares global rank with peers.

Persona 3 — The Curious Professional

Age 28–45 | Working professional | Time-constrained | Uses Geeky in 15-minute bursts; focuses on specific domains like Biology, Coding, or Philosophy; values clean UX and dark mode.

Persona 4 — The Intellectual Debater

Age 20–40 | Opinion leader | Enjoys writing and discourse | Primarily uses the Debate Arena; learning history propels debate credibility; follows trending debate threads.

3.2 Geography

- Phase 1 (Launch): India, Southeast Asia, Sub-Saharan Africa, Latin America
- Phase 2 (Month 6): UK, EU, North America
- Multi-language UI: English, Hindi, Malayalam, Spanish (roadmap)

4. Core Features & Requirements

4.1 Authentication & Onboarding

4.1.1 Sign Up / Login

- Email + Password registration
- Phone number (OTP via SMS/WhatsApp)
- Username selection (unique, publicly visible)
- OAuth: Google, Apple, Facebook
- Onboarding quiz: selects 3–5 initial subjects of interest
- Animated intro tour — Greek library theme with scrolling columns

4.1.2 Profile Setup

- Display name, username, avatar (choose from illustrated Greek figure set or upload)
- Optional: bio, linked social handles
- Interest tags auto-generated from onboarding quiz

4.2 Home Screen

The home screen is the intellectual 'Agora' — the Greek public gathering space. It surfaces four primary navigation zones:

Zone	Description	Icon Theme
Profile	Personal dashboard, gamification stats	Laurel wreath / column
Debate Arena	Twitter/X-style discourse threads	Amphitheatre steps
Subjects Library	Course catalogue — main learning hub	Scroll/codex
Settings	Dark/Light mode, notifications, account	Owl (Athena)

- Persistent bottom navigation bar on mobile (iOS/Android)
- Dark Mode / Light Mode toggle accessible from Home and Settings
- 'Today's Idea' widget: daily quote/concept from a subject the user is studying
- Active Streak indicator visible on home screen

4.3 Profile & Gamification

4.3.1 Profile Dashboard

The profile page is a personalised 'Codex' — a scholarly record of intellectual achievement. It includes:

- Avatar + username + level title (e.g., 'Apprentice Philosopher', 'Scholar of Sciences')
- Learning XP Bar — fills as user completes content, quizzes, and flashcards
- Global Rank displayed prominently (e.g., #12,344 / 500,000)
- Subject badges — subject-specific icons awarded on completing 25%, 50%, 75%, 100% of a subject

4.3.2 Progress Statistics

Stat	Display	Update Frequency
Subjects Covered	Count + donut chart	Real-time
Average Quiz Score	Percentage across all attempts	Per session
Flashcards Revised	Total count + last 7 days graph	Real-time
Time Spent Learning	Total hours + weekly bar graph	Daily
Streak Count	Fire icon + day count	Daily midnight reset
XP Earned This Week	Progress bar vs weekly goal	Real-time

4.3.3 Streak System

- Daily streak: complete ≥ 1 learning session or quiz per day
- Streak shields: earned after 7-day streaks; protects 1 missed day
- Weekly streak milestones at 7, 30, 100, 365 days — unlock exclusive badges
- Push notification at 8PM if streak at risk

4.3.4 Achievements & Badges

- First Scroll — Complete first lesson
- Dialectician — Win 10 debates (voted by community)
- Polymath — Study 5 different subject domains
- Oracle — Score 100% on 10 consecutive quizzes
- Librarian — Revise 500 flashcards
- Marathon Scholar — 100-day streak
- Custom subject-specific badges (e.g., 'Biochemist', 'Stoic', 'Coder')

4.3.5 Global Leaderboard

- Weekly and All-Time rankings
- Filter by: Country, Subject, Age Group
- Top 100 feature on a 'Hall of Scholars' page
- Friends leaderboard (follow system)

4.4 Debate Arena

4.4.1 Core Structure

The Debate Arena is modelled on structured intellectual discourse — combining the format of Twitter/X threading with the rigour of academic debate. It is not a social media clone but a knowledge-first discourse space.

- Posts called 'Arguments' (max 500 characters, expandable to 2000 for premium)
- Threaded replies — 'Rebuttals'
- Upvote / Downvote on Arguments (not mere likes — framed as 'Support' / 'Challenge')
- Topic tags linked to Subjects (e.g., #Philosophy, #QuantumPhysics)
- 'Source' attachment — link a research paper, book, or Geeky content as evidence

4.4.2 Discovery & Feed

- Home feed: 'Actively Debated' topics pinned at top (by engagement velocity)
- Trending topics sidebar (web) / swipe card (mobile)
- 'Relevant to You' section — AI matches debate topics to user's recent learning
- Push notification if a new debate is created in a subject the user studied in last 7 days

4.4.3 Creating Debates

- Any user can open a debate thread — assign subject tag, motion, and opening argument
- Debate prompts suggested by AI based on content recently consumed
- Debate lifespan: 7 days (standard) or 30 days (community-voted 'Grand Debates')
- Voting: community votes on which side of a debate 'won' at close

4.4.4 Moderation

- AI toxicity filter (Perspective API integration)
- Human moderator escalation queue
- Three-strike system: warning → temporary mute → ban
- Users can flag Arguments; three flags auto-hides pending review

4.5 Subjects Library

4.5.1 Subject Catalogue

The Subjects section is the intellectual heart of Geeky — a living library modelled on the breadth of world-class university curricula.

Domain	Example Subjects
Philosophy & Ethics	Ancient Greek Philosophy, Ethics, Logic, Political Philosophy, Philosophy of Mind
Literature & Languages	English Literature, World Literature, Linguistics, Latin, Sanskrit, Rhetoric
History & Civilisations	World History, Ancient Civilisations, Economic History, History of Science
Mathematics	Calculus, Linear Algebra, Discrete Mathematics, Statistics, Number Theory

Domain	Example Subjects
Physics	Classical Mechanics, Quantum Physics, Relativity, Thermodynamics, Astrophysics
Chemistry	Organic Chemistry, Inorganic Chemistry, Biochemistry, Physical Chemistry
Biology	Cell Biology, Genetics, Ecology, Evolutionary Biology, Neuroscience
Computer Science	Programming (Python, C, Rust, JS), Data Structures, Algorithms, AI/ML, Systems
Economics	Micro, Macro, Behavioural Economics, Development Economics, Game Theory
Psychology	Cognitive Psychology, Social Psychology, Clinical Psychology, Neuroscience
Political Science	Political Theory, International Relations, Comparative Politics
Law	Constitutional Law, International Law, Contract Law, Legal Philosophy
Arts & Music	Art History, Music Theory, Film Studies, Aesthetic Theory
Engineering	Electrical Engineering, Civil, Mechanical, Bioengineering fundamentals
Medicine & Health	Anatomy, Physiology, Epidemiology, Public Health
Sociology & Anthropology	Sociological Theory, Cultural Anthropology, Gender Studies

- Subjects added incrementally — push notification to followers of related subjects on new additions
- 'Coming Soon' teaser cards for subjects in pipeline
- Users can request subjects via a voting system

4.5.2 Subject Detail Page

Each subject page is structured as a digital 'Codex' — sections divided like a beautifully illuminated manuscript:

- Overview card: subject description, prerequisites, estimated hours
- Progress ring: % of subject content consumed
- Sub-topics: ordered list (e.g., Philosophy > Ancient Greek > Socratic Method > The Republic)

4.5.3 Sub-topic Content Types

Content Type	Description	AI Enhancement
Video Lessons	Curated YouTube/academic videos playable in-app; no redirect	AI-generated chapter markers + transcripts
Research Papers	PDFs of landmark papers; highlighted key sections	AI summary + key terms glossary
Books (PDF)	Public domain + licensed academic texts	AI reading guide + key passage highlights
News & Articles	Relevant current events linked to topic via RSS + AI curation	AI relevance score + topic tagging
Blogs & Essays	Curated expert essays and longform writing	AI key insight extraction
AI Flashcards	Auto-generated from ALL content consumed	Spaced repetition algorithm (SM-2)
AI Quizzes	MCQ, short answer, true/false — auto-generated	Adaptive difficulty based on performance

4.5.4 AI Flashcard System

- Triggered automatically after consuming any content piece
- Extracts key concepts, definitions, dates, formulae, and arguments
- Card types: Definition, Concept, Formula, Timeline, Compare & Contrast
- Spaced repetition: SM-2 algorithm determines review intervals
- User can rate card difficulty: Easy / Hard / Again
- Deck view: browse all cards for a sub-topic
- 'Quick Revise' mode: 5-minute flashcard burst with timer

4.5.5 AI Quiz System

- Auto-generated from content of each sub-section
- Question types: MCQ (4 options), True/False, Fill-in-the-blank, Short answer (AI-graded)
- Adaptive difficulty: harder questions if user scores >80%, easier if <50%
- Detailed answer explanations with source reference
- Score recorded to profile; contributes to global rank XP
- 'Challenge a Debate Opponent' — quiz result can be attached to a debate argument as proof of mastery

5. UI/UX Design Language

5.1 Theme — The Greek Library

Geeky's visual design is rooted in the aesthetic of ancient Greek and Hellenistic libraries — the Library of Alexandria, the Stoa of Athens, the Bodleian's classical wing — merged with modern digital elegance.

Design Element	Specification
Primary Palette	Deep Navy (#1A1A2E), Slate Blue (#16213E), Warm Parchment (#E8DCC8), Antique Gold (#B8860B)
Accent Colour	Oxford Blue (#0F3460) for interactive elements
Typography — Headings	Georgia or Playfair Display (serif) — classical, scholarly
Typography — Body	Inter or IBM Plex Sans (clean, legible)
Iconography	Custom-illustrated Greek motifs: columns, scrolls, laurels, owls, amphora
Textures	Subtle marble/parchment textures on cards and backgrounds (not distracting)
Dark Mode	Deep navy background, gold highlights, muted parchment for text
Light Mode	Off-white parchment base, navy accents, gold highlights
Animations	Smooth, scholarly — page turns, ink-writing text effects, scroll unfurl for new content
Cards	Rounded rectangles (12px radius) with subtle drop shadows and gold left-border accent

5.2 Gamification UI Inspiration

- Duolingo: Daily streak fire + XP bar progress + celebratory animations on milestone
- Coursera: Structured progress tracking, certificate-card visual for subject completion
- Elite Academy (<https://elite-academy-24.preview.emergentagent.com/>): Clean section hierarchy, polished course cards
- Geeky differentiator: All gamification elements styled in Greek/classical motifs — no generic game aesthetics

5.3 Key Screens Summary

Screen	Key UI Elements
Home / Agora	4-quadrant icon grid, Today's Idea card, streak indicator, recent activity feed
Profile / Codex	Avatar + level banner, XP ring, stats grid, achievement shelf (scroll-horizontal)
Debate Arena	Thread-style feed, trending sidebar, argument composer, voting buttons

Screen	Key UI Elements
Subject Library	Grid of subject cards with domain colour coding and marble texture
Subject Detail	Codex-style layout, content type tabs, progress ring, recommended next step
Flashcard Viewer	Card-flip animation, difficulty rating buttons, progress indicator
Quiz Mode	Full-screen question, 4-option MCQ, timer ring, instant feedback screen
Leaderboard	Podium-style top 3, scrollable rank list, country flag indicators

6. Notifications Strategy

Trigger	Notification Type	Message Example
New subject added in followed domain	Push + In-app badge	☐ New subject added: 'Neurolinguistics' in Language Sciences
Streak at risk	Push at 8PM	☐ Your 14-day streak is at risk! Open Geeky to keep it alive.
Relevant debate created	Push	⚡ A new debate on 'Stoic Ethics' matches your recent learning
Weekly rank change	Push (Monday)	☐ You climbed 234 spots this week. You're now #11,230 globally
Flashcard review due	Push (morning)	☐ 12 flashcards are ready for review today
Quiz milestone	In-app	☐ Achievement unlocked: Oracle — 10 perfect quizzes in a row!
Friend joins Geeky	Push	☐ [Username] just joined Geeky. See their rank!

7. Monetisation

7.1 Tier Structure

Tier	Price	Features
Geeky Free	₹0 / \$0	5 subjects, 50 flashcards/month, standard quizzes, Debate Arena (500-char limit), Light/Dark mode
Geeky Scholar	₹299/month or ₹2,499/year	Unlimited subjects, unlimited flashcards, extended debate (2000 chars), offline mode, ad-free, custom avatar accessories
Geeky Polymath	₹599/month or ₹4,999/year	All Scholar features + AI study planner, early access to new subjects, PDF annotation, priority support, exclusive Polymath badge

7.2 Additional Revenue

- University & institution licensing — white-label subject packs
- Sponsored subject packs from NGOs or research bodies
- In-app badge cosmetics (avatar accessories, profile frames)

8. Product Roadmap

Phase	Timeline	Milestone
Phase 0 — Foundation	Month 1–2	Auth, subject catalogue (50 subjects), basic flashcard/quiz engine, home screen
Phase 1 — MVP Launch	Month 3	Full gamification, Debate Arena, 100 subjects, iOS + Android + Web
Phase 2 — Growth	Month 4–6	200+ subjects, spaced repetition v2, leaderboards, social follow system
Phase 3 — Monetisation	Month 6–9	Scholar/Polymath tiers, offline mode, PDF annotation, AI study planner
Phase 4 — Global	Month 9–12	Multi-language, university partnerships, institution licensing
Phase 5 — Scale	Year 2	AI tutor chatbot, live debate sessions (audio), Geeky API for institutions

9. Success Metrics & KPIs

Metric	Definition	Target
MAU	Monthly Active Users	200K at 6 months
DAU/MAU Ratio	Engagement ratio	≥ 30%
Avg. Session Duration	Minutes per session	≥ 18 mins
Quiz Completion Rate	% of started quizzes finished	≥ 70%
Flashcard Revision Rate	Cards revised vs cards generated	≥ 60%
Debate Engagement	Arguments per active user/week	≥ 3
30-Day Retention	Users returning after 30 days	≥ 45%
Premium Conversion	Free to paid conversion	≥ 8%
App Store Rating	iOS + Android avg rating	≥ 4.6 stars

10. Assumptions & Constraints

Assumptions

- Users have intermittent internet (offline flashcard mode in Phase 3)
- AI content generation uses Anthropic Claude API as primary LLM
- Debate moderation will require 2 full-time human moderators at launch
- Initial content curation is human-editorial, AI-assisted from Month 4

Constraints

- Copyright compliance for research papers and books (PDF sourcing limited to public domain or licensed)
- Video content hosted externally (YouTube API) to manage storage costs
- SMS OTP costs managed via Twilio; throttled to 3 OTPs per number per hour
- GDPR and India DPDPA compliance mandatory from Day 1
